

# Financing

- **Different financing:**
  - EU structural funds
  - Public financing
  - Private financing
  - Revolving funds
- **Status of the financing instruments in each partner countries for energy-saving measures in housing stocks and additional financing instruments for district heating and renewable energies**

# Using BEEN results for Urb.Energy

- Results of Good practices for the housing stock
- Results of measures package for refurbishment
- Results of the pilot financing
- Results of the social condition for refurbishment
- Results of the financing instruments development
- **Aims:**
  - Using results for develop good practices to the target areas of the project Urb.Energy
  - Basis for developing new financial strategies

# Need of innovative financing instruments

- Financing concepts for integrated urban development
- Involvement of financial stakeholders
- Using available sources of EU, national and local level
- **Results:**
  - financing concepts for the target areas
  - Pooling of financing strategies
  - ideas for new financing instruments
  - discussion for further developing existing financing instruments of EU, national and local level

## Come to a new approach

- **Energy efficiency concepts for the target areas will be the beginning for developing financing instruments for realising the measures in the concepts**
- **The financing proposals depends of the different financing condition and law on EU, national and regional/municipal level**
- **We will look for better opportunities to implement the concepts in the target areas**
- **Experiences of this study process shall generalise to common rules as possible**
